EDUCATION

Duke University

M.S. in Statistical Sciences (37 credits)

Class of 2026

GPA: 3.88

University of Maryland, College Park

B.S. in Chemical Engineering & B.S. in Economics (200 credits)

Class of 2022

GPA: 3.86

Honors/Awards:

Honors College | President's Scholarship | Dean's List all semesters | 2018 President's Award for Educational Excellence | 2018 State of Maryland Merit Scholastic Award

Relevant Coursework: Intro to Java & OOP - University of Pennsylvania*, Programming II - University of Wisconsin, Madison, Neural Networks and Deep Learning – DeepLearning.AI*, Machine Learning – Stanford*, Econometrics, Predictive Modeling, Financial Markets, Time Series

EXPERIENCE

Carnegie Mellon University | Remote

May 2025- Sept 2025

Research Assistant – Prof. William Townes (25 hrs/week)

- Analyzed large-scale All of Us wearable datasets to develop autoregressive forecasting models for infectious disease detection
- Investigated utility of wearables data in epidemiological setting
- Forecasted flu cases using autoregression and TimesFM, a zero-shot model for time series
- Integrated LLM APIs to investigate generative AI utility in forecasting

Duke University | Durham, NC

June 2025 - Aug 2025

Project Manager – Data+ Program (10 hrs/week)

- Led a team of 5 undergraduates on an industry-sponsored project modeling jewelry insurance fraud using real-world claims data
- Oversaw modeling of jewelry insurance fraud using data from Jeweler's Mutual using XGBoost and CatBoost models with data gathering using PySpark

Duke University | Durham, NC

Aug 2025 – Present

Teaching Assistant– Statistics Department & Business School (12-15 hrs/week)

- Led discussions and grading for Business Analytics, Advanced Data Visualization, and Intro to Data Science
- Led weekly office hours and guided students through statistical modeling and data analysis concepts in R

Epic Systems | Verona, WI

July 2022- July 2024

Technical Solutions Engineer - Analytics Division (45 hrs/week)

- Developed analytics strategies and reporting solutions for healthcare organizations using large datasets
- Wrote complex SQL queries against large healthcare databases and built statistical models in R to analyze longitudinal feature adoption patterns across client organizations
- Presented analytical findings and product demonstrations to analytics leadership and client stakeholders
- Collaborated with engineering teams to implement predictive modeling solutions within cloud-based analytics platforms
- Recruited new graduates at career fairs
- Created Excel Macros and Power Automate Flows for scheduling and note taking

American Enterprise Institute | Washington D.C.

June 2021- Dec. 2021

Research Intern (40 hrs/week)

- Collected large data sets (50+GB) and collate in R
- Developed visualizations and identified disproportionate lobbying in certain industries

SKILLS

- Programming Languages: Python, Java, R, SQL, MATLAB
- Software/Tools: Microsoft Office, SAS, Power Automate, VS Code, RStudio, Git/Github, Gemini, ChatGPT, Claude
- General: Statistical Modeling, Forecasting, Financial Models, Analytical Writing, Machine Learning, Deep Learning
